Brand Name : **SAFEPRO**

Color	RED
Size Of Branch Pipe	63mm
Size Of Nozzles	6mm
Material	Aluminium Alloy
Conforming Specification	IS 903:1993
Body, Assembly	IS 617
Rubber Washer	IS : 937 (TYPE-B)
Features	- Different types of Firefighting branches and nozzles for various applications are manufactured by us. These are manufactured to strict quality standards and tested to ensure reliable performance. Provided with 63 mm Male Instantaneous Inlet, different Inlets and sizes can be provided on request. The Short branch is still commonly used in most Fire Brigades as the Basic Firefighting nozzle. This can be fitted with a choice of nozzles suitable to flow and operational requirement. Our Short branch is manufactured to Indian Standard IS: 903 and marked thus. Made from G.M. or SS304, Aluminium versions (non-ISI) also available.
